

3 ROADS TO TRANSFORMING YOUR ORGANIZATION WITH ANALYTICS ON AZURE

SAS® helps pioneering organizations achieve transformative results so you can continuously innovate and operationalize trusted decisions. Now SAS Viya has been optimized to quickly deploy and run on Azure and seamlessly integrate with services such as Synapse and Azure Kubernetes Service.

It's never been easier to run your data, analytics, and AI workloads in the cloud. With three options to meet your organization's needs, see which is right for you.

OPTION 1:
START IMMEDIATELY WITH NO SETUP OR MAINTENANCE

Do you need a single point of contact who can provide expertise for all your support needs?

Do you want to decrease the workload for your IT team?

Do you need a secure, high performing infrastructure, with guaranteed SLAs?

Do you need an expedited project start?

With SAS Hosted Managed Services, you don't have to worry about setup or maintenance. We install, configure, update, and manage your SAS Software on a cloud infrastructure specifically tuned to your needs.

OPTION 2:
ADD SAS EXPERTISE ON YOUR AZURE CLOUD

Do you want flexible advanced analytics in your Azure environment, but need help managing and monitoring the environment?

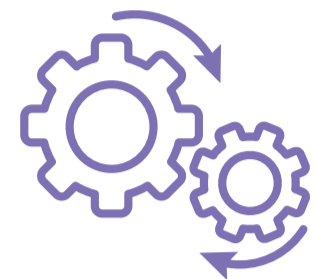

Do you need support 24/7 with a 99% software uptime guarantee?

Do you want your software solutions to be continually updated and managed by a team of experts?

Take advantage of cutting-edge SAS technology and maximize uptime with SAS Remote Managed services on Azure, enabling you to utilize your own Azure tenant with SAS monitoring and management services.

OPTION 3:
KEEP COMPLETE CONTROL OF YOUR APPLICATIONS ON YOUR AZURE CLOUD

Do you have an existing Azure environment for your workloads or use Azure services across your organization?

Are you able to create applications in containers and use services like Azure Kubernetes Services?

Does your organization want to maintain control over your analytic applications?

Maintain complete control over the full stack with a self-managed solution run on your Azure tenant.

REIMAGINE ANALYTICS IN THE CLOUD WITH SAS ON MICROSOFT AZURE.

SAS and Microsoft Azure make it easy to run your data, analytics, and AI workloads in the cloud. Now everyone can unlock critical insights on the path to digital transformation and make decisions that are automated, trusted and analytically driven.
